

## Evolve Learning Manager Learning Management System

### The most cost-effective learning management system available!

Evolve e-Learning offers the most scalable, flexible and affordable training solution in the industry with our Evolve Learning Manager LMS. We host the LMS for you so getting started is easy, fast and affordable. While you don't have to install and manage servers and load and setup software, you still have full administrative control of the learning management system and your employee training and development programs.

#### Reduce the Cost of Training Administration with Evolve Learning Manager LMS

The solution to cost-effective training administration is Evolve Learning Manager LMS. With the Evolve LMS, you can manage all the administrative functions that surround learning at a fraction of the cost of traditional systems.

Our hosted solution gives you a fast time to recognize your eLearning ROI. The system contains a feature rich set of templates and automation tools to import user, organization, and course data to quickly establish a functional learning system.

If you license courses from us to deploy in the system then all course files will already be setup for you, you'll only need to create course offerings specific to your organization's training needs.

With the GUI based configuration tools, you'll be able to configure the LMS to your exact training needs; without programming or long-term professional service contracts. Functions within the system are intuitive and most are accomplished with just a point and click.

Evolve Learning Managers LMS optimizes the effectiveness and efficiency of administrators and learners alike with streamlined interfaces that make sure every operation is quickly and easily accessible.

With a single sign-on, administrators gain complete control of all training administration with a centralized dashboard that eliminates the need for multiple roles or sign-ons.

#### The Evolve Learning Manager LMS Advantage

##### Achieve fast time-to-value.

- Evolve Learning Manager can be deployed in just a few short days - not weeks or months like most other systems. The hosted LMS environment allows you to be up and running with a branded environment in just a matter of days. Learners can be quickly imported into the LMS and registered for training using the Bulk Import module.

##### Take the cost out of implementation and maintenance.

- No programming is necessary with the Evolve Learning Manager LMS. Administrators can rapidly configure the learning environment to suit their specific training environment.

##### Configuration is simple

- The Evolve Learning Manager LMS design ensures flexible customization and provides the ability to add, remove and control user access to major menu tabs from the application.
- Administrators can add new modules to display within a menu tab and change the order in which menu tabs are displayed. Ten user defined fields are available to use for additional student information.

##### Flexible organizational structure

- The organizational structure is fluid in the LMS, not predefined. Multiple levels are available, each with their own hierarchy of information; so users with certain roles in a parent organization may see the activity of people in a sub-organization.
- This flexibility also allows decentralized administration to distribute workload among multiple administrators.

##### Easily Integrate with your HRIS or ERP

- Evolve Learning Manager LMS integrates easily with leading HRIS systems such as PeopleSoft and SAP to further reduce administrator time and effort.
- Training events such as student course enrollment, automatic email notifications, and more can all be automatically initiated in the LMS based on the new student data elements imported into the system.

##### Manage eLearning and classroom training

- The Evolve Learning Manager LMS provides the functionality to deliver and manage both online and classroom training; allowing both types of courses to be scheduled and tracked for all students.
- Scheduling ILT training courses is managed with through the resource module and gives Instructors multiple tools for scheduling and updating attendance or grading classroom events.

##### Increase Student acceptance to improve learning.

- The LMS features are accessed based on role assignment. While predefined roles are already in place following a standard setup of the LMS, administrators may customize all functionality, including the addition of new roles to meet unique users' needs.
- The user's role determines which of the functionality they will see and which module on each page the user is able to view and/or edit.

## Product and Feature Overview

- Automatically tracks eLearning course scores and completion.
- Grade scores (or Pass/Fail) for instructor led training (ILT) may be assigned to employee records.
- A passing score may be assigned within the LMS for each course created.
- Certifications with configurable expiration date ranges.
- Evaluations associated with course offerings
- General surveys available to everyone.
- Ability to create online test question pools for randomized verification of training completion and certification. A printable presentation of the test may also be generated from the question pools.
- Email notification to employees who are registered for a class, who request administrator approval for courses, and recertification for courses.
- Email notification to managers when there is a course status change.
- Ability for Instructor to track employee attendance as well as score employee exams.
- Manager access to training enrollment, performance and progress about employees.
- Default standalone reports to determine training completion status and progress.

## Administrator and Trainer Advantages

- Launch and track SCORM content.
- Online, real-time reporting in web, PDF, Microsoft Word and Excel formats.
- Graphical Managers and Student Dashboards for training status and completions.
- Communications—to include threaded discussions, email, announcements, and calendar.
- Create custom training with content authoring management system or use any third party SCORM conformant authoring tool.
- Manage and track instructor-led training, workshops and seminars.
- Automatic email announcements for course status changes, enrollment, certification expiration and much more.
- Create Certification programs by learner or group profiles and include classroom and online training courses.
- Assessment engine for test building with randomizing and pooling of multiple question types including True/False, Multiple Choice, Fill In The Blank and Matching.
- Evaluation and Survey module for course evaluation.
- Multiple languages available with ability to customize most LMS headings and menus.

## Student Advantages

- Simple and easy to use interface.
- Courses are available 24/7.
- Self-paced training.
- Searchable content allows for training on specific tasks.
- Discussion boards for knowledge sharing with other students and instructors.
- Receive e-mail confirmations when registering for events.
- View and keep track of event schedules via system calendar.
- View training status and results in Transcript and print Certificates of Completion.
